That's why the things microbes eat
don't disappear in bites. They change,
slowly, into something else...

FOOD *INTO* COMPOST

MILK *INTO* YOGHURT

ROCKS *INTO*
SOIL

A green spoon filled with dark brown soil is positioned in the upper left corner of the page.

And a teaspoon of soil can have
as many as **a billion** microbes.
That's about the same as the number
of people in the whole of India.
