# Plants

Growing from the forest floor are all kinds of plants, trees and shrubs.

Tree

Flower

Mushroom

Leaf

Acorns

Berries

All trees have roots, a trunk and branches.  
Some also have fruit and flowers.

Wild mushrooms are part of the fungi family and come in all shapes and sizes.

The big, tall Oak tree grows  
from a single acorn.

The colourful parts of a flower are called petals.

Leaves grow from buds. They grow, change colour and then drop with the seasons.

Berries are a popular food  
for birds, especially during  
the colder months.
