

CATCHING YOUR BEES

This may require some agility.

To catch bees you should dress appropriately. It is best to catch bees with professional equipment, but a net may suffice.

Your net can be any shape, but should be large enough to hold more than one bee at a time.

Entice the bees towards you with flowers or a bee-inspired waddle dance.

Bees love to be caught and will come quite easily to you.

HOUSING NEW BEES

Now simply place the bees in the hive and you are ready.

Wait – what?
What is a hive?

Fig. a. A beehive.

A hive is a house for bees. If you do not have one yet, it is important to stow your bees safely until you have built your hive.

Do NOT put them:

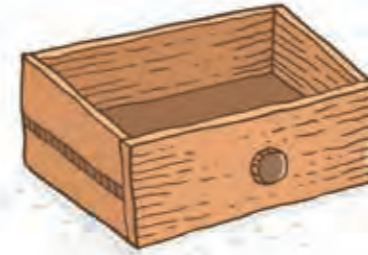

Fig. 1. In a drawer.

Fig. 2. In a large saucepan.

Fig. 3. Underneath your pillow.

Er, I wouldn't.

I did say.

IMPORTANT NOTE: always remember where you have put your bees.

KEEPING YOUR BEES

You are now an expert beekeeper. Congratulations!
Relax and enjoy your bees.
This requires no effort.
